The Dangers of the Covid "Vaccine" to Pregnant Women: Do Not be a Lab Rat. The Untested Experimentation on Babies and the Unborn

Media Justice

*** Last year I warned pregnant women of dangers from the flu vaccine. This warning is likely to amount to little when

country. It is a tall tale the Department of Health and Social Care and Nadhim Zahawi MP are telling women to encourage them to participate in the murder of their unborn. Following 130,000 pregnant women being vaccinated in the US and no safety concerns being raised, the Pfizer/BioNTech and Moderna

Published in early August the UK government is urging pregnant women to take part in these infanticide trials the length and breadth of the

vaccines were recommended by the independent experts at the Joint Committee on Vaccination and Immunisation (JCVI) for pregnant women in the UK. Almost 52,000 pregnant women in England have now been vaccinated – similarly, with no safety concerns reported.

You will see that the government website does not provide a link for this US information. There is good reason. The link is here. Note: those doing the research were all on the government payroll, with affiliations to CDC (Center for Disease Control and Protection) or the FDA

Further note: by the time the report was published only 21% of pregnancies had come to an end (this includes stillbirths and abortions). And there has not been time to determine post-natal effects on babies.

Partisan research of this nature luring pregnant women to become guinea pigs is far from robust. Follow-up of those vaccinated has not been done. Yet they want more and more innocent victims for their spikes – which once in the body can never be removed. The vaccines introduce only the spike whereas if left to the body's immune system it produces protection from the whole virus cell.

It is known that placebos are being used in these trials, and suspected that attenuated "vaccines" are also being used. Couple this with the faulty PCR test and the financial influence of Big Pharma companies on those doing the research, expecting mothers must balance a dodgy sales-pitch against the untested experimentation on their babies and the unborn with life-threatening and life-changing concoctions.

The spike protein from inoculations attack various organs in the body. Lipid nanoparticles concentrate in the ovaries in women (and testes in men).

Watch and listen to Dr. Ryan Cole explain (the part about testes and ovaries starts at 10 minutes 15 seconds). Also disturbing Dr. Cole has seen a
